OPERATIONS ANNOUNCEMENT

Toncoin (TON) to Gram (GRAM) rebrand

Kaiko Indices, a benchmark administrator authorized and regulated by the French Financial Markets Authority (the “AMF”) under Regulation (EU) 2016/1011 (the “EU Benchmark Regulation” or “BMR”), hereby announces the treatment of the renaming of Toncoin (TON) to Gram (GRAM) across its rates.

Description of the Change

Following a community governance vote concluded on June 8, 2026, the native token of The Open Network is being renamed from Toncoin (TON) to Gram (GRAM), effective 12:00 UTC on June 15, 2026.

This is a rebranding only. There is no token swap, bridge, claim, or migration; the asset, its smart contracts, supply, and all balances remain unchanged.

Kaiko’s Treatment

For each Kaiko rate referencing Toncoin, an equivalent GRAM rate will be created with Gram (GRAM) as the underlying asset (e.g. KK_RFR_TONUSD → KK_RFR_GRAMUSD). Client access will be provisioned ahead of the effective date.

From 12:00 UTC on June 15, 2026, the GRAM rates constitute the official reference rates for the asset. This timestamp aligns with the coordinated update time set in the official network announcement.

The full price history of each TON rate will be later available under its equivalent GRAM rate, providing a single continuous series.

The existing TON rates will continue to be calculated and disseminated for a transition period to allow clients to migrate, but are no longer the effective rates for the asset after 12:00 UTC on June 15, 2026. They are scheduled for decommissioning at the upcoming rates rebalancing.

Impact Assessment

Exchanges are expected to perform a coordinated ticker update at 12:00 UTC on June 15. In practice, individual exchanges may update their trading pairs and APIs at different times. Kaiko is monitoring the situation closely, including exchange-level adoption of the GRAM ticker and any developments affecting constituent markets during the transition window, and will communicate any updates as applicable.

This notice is made in accordance with the transparency requirements set out in the BMR. For further details regarding the methodology and data sources, please refer to the Resource section of the Kaiko website.
